Comments on Teaching:

[Student 2693](#) - helpful outside of class, appreciated the time and comments on papers. questions in recitation are sometimes very unclear or lengthy so no responses are due to lack of comprehension of the question rather than the readings.

[Student 6282](#) - Sometimes the way you phrased your discussion questions was so long that it was challenging to dissect what you were asking.

[Student 37185](#) - I think he is great at teaching, lecturing, and discussing the material. Nevertheless, I must point out that the recitations were hard to understand. I don't know if it was him, but I felt that many of the readings were too long, boring, and often confusing. Regardless, his abilities to teach are very impressive and his patience and willingness to help are remarkable.

[Student 39852](#) - Sebastian was very helpful throughout the entire semester. His recitations visited some important readings very effectively and answered questions well. It was a good review at the end of the week!
